

Roto-Molded Pallets Offer Unlimited Designs for the Most Economical Materials Handling Solutions

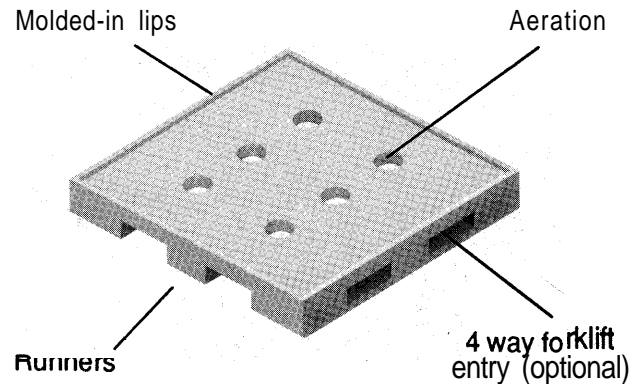

Roto-molded plastic pallets have proven superior in the movement and storage of raw materials and finished goods.

As a result, growing numbers of materials handling managers in industries ranging from food and beverage to chemicals and pharmaceuticals — where strength, cleanliness, washability, and contamination reduction are all basic requirements — have come around to the conviction that: as far as pallets are concerned - - **WOOD IS OUT AND PLASTIC IS IN.** These users have learned to their astonishment that, in many areas, plastic pallets are more cost-effective than their old, supposedly cheaper wood stand-bys.

The life span of a wood pallet, for example is five to ten trips, while an average plastic pallet offers 20 to 25 trips. A THERMODYNAMICS pallet can travel as much as 100 trips! Moreover, roto-molded plastic pallets have significantly lighter weight and a far greater ability to adapt to diverse sizes and shapes than wood.

Plastic pallets are substantially lighter than wood and therefore, additional savings in freight costs are achieved. Roto-molded plastic pallets are a one-piece integrally molded design that are non-absorbent and can be washed thus reducing product spoilage from contaminants such as nails and splinters.

Check the benefits listed and call or write THERMODYNAMICS for further information about specific applications and many available options.

The Advantages of Roto-Molded Pallets

Wood pallets tend to splinter, break and contaminate products. Roto-molded plastic pallets offer optimum strength, economy and meet sanitary requirements.

- Recyclable
- Eliminates splinters and nails
- One piece design for added strength
- Light weight for easy handling
- Economical & long lasting
- Non-absorbent, reduces contamination
- Washable
- (Optional) Internal reinforcement frame for unsupported rack storage
- Flexible in design
- Reusable
- Easily repaired
- Weather resistant
- Stress free
- Cost effective
- Superior service life
